

Calendar Direction Sheet and TOU:

~These are just printable sheets not an actual calendar until you do one of the following~

This is a printable JPG file. Each Calendar picture and Calendar page are saved in 300DPI and will print wonderfully on an 8 ½" X 11" sheet of paper. You may also resize them smaller so that both the Picture and the Actual Calendar page print on 1 -8 ½" X 11" sheet together. This allows you to choose the size of Calendar you would like. You can either place the pictures into a calendar creator you may already have in a photo editing program, or take them on a flash drive or CD to your nearest print shop such as Kinko's and let them do all of the work for you. Zazzle on the internet is a great place to upload and print the files into a calendar also, they do everything including the binding. If you have a binding machine you may want to print and bind your own calendar. Whatever you choose to do with the files is up to you. I only ask that you do not claim them as your own or sell them. Have fun and ENJOY a great and prosperous year!
